Prayer Partner Weekly Update

In making every effort to love and respect those who make prayer requests, it is our desire as a Church to provide any and all information (for which we have been given permission to share) so that we can pray faithfully for the needs and requests of others. Our heart is to make sure all are lifted up in prayer, but also to respect the privacy of those who wish to keep certain information confidential.

In this light, when making prayer requests, it is important to let us know if any information is confidential and should not be shared with the general public. Please know that you are loved, respected, and prayed for by your church family.

Due to patient privacy rights, Ballard Health can no longer provide patient status, and will not be able to look up TABC for members that may be a patient. Ballard staff will check patient status if we have a "name" for them to check. Therefore, we will need to rely on our members, family, and friends to let us know if someone is in the hospital and needs to be added to our prayer list.
